CABLE LUG CONVERTER

TYPE: LC-S150-LD and LC-S150-LS

This device allows a standard cable lug to be temporarily or permanently terminated to a Powersafe 500 Amp connector. The cable lug is simply bolted to the Powersafe electrical contact and the connector assembled as normal. Suitable for cable lugs with M12 through holes for cable sections of 35-150mm².

Key Features include:

- Facilitates standard cable crimp lugs
- IP68 when mated
- Up to 500Amp operation
- No special tools required.
- Lugs can be quickly terminated to the connector.
- Suitable as temporary or permanent connection.
- No adaptors so insulator mechanical and electrical properties are maintained.
