	90 Degree Powersafe	Rev. Date 31-01-08	Rev A 01

Type RA - 90 DEGREE POWERSAFE CONNECTOR

The RA Powersafe connector allows cables hung at 90 degrees from the panel mounted connectors. The reduced cable protrusion is a useful option where minimal space is available for connection of temporary power cables.

The RA connector is fully mateable with all other Powersafe connectors. Cables up to 300mm² cross sections can be accommodated.

Termination of the cable is via a crimp element. A key feature of the design is that during coupling the front ring of the connector rotates into the locked position, whilst the cable remains in a vertical plane.

Both Source and Drain (plug and socket) configurations can be supplied.

Key Features

- Cables up to 300mm²
- Free rotation of coupling element
- Minimal space requirement
- No special tools required
- Full compatible with Powersafe connectors.
